

The Gateway System Provides Efficiencies, Accuracy & Customer Satisfaction

Gateway is a leading vehicle damage detection system delivering efficient results and accurate data, resulting in a new level of customer satisfaction.

It provides a solution for service centers, rental car agencies, and more. Gateway provides actionable insights for customers and service pros through a drive-through automatic recognition, documentation, and detection system.

AI-driven Damage Detection

Automate inspections, condition reports, and high-res images

Data & Insights

A new source for detecting, sharing, and storing vehicle reports

Faster Inspection Time

A full body condition report in seconds

Liability & Risk Reduction

Pinpoint exactly when and where damage occurs for insurance claims

Key Product Features

- » AI Damage Detection
- » Vehicle Documentation
- » 10MPH /15KPH Speed
- » API Integration
- » User-friendly Dashboard

System Capabilities

Performance: Capable of scanning 60 vehicles per hour and providing a full condition report in 7-seconds.

Versatility: Mobile set-up and flexibility for positioning stations. Automated drive-through for efficient documentation and self check-in/out.

Profitability: A new source of data and insights to share, resulting in a revenue generating product to sell into customers.

Automated drive-through for efficient documentation and self check-in/out

Customer Transactions available when the rental office is closed

Available for car-sharing services
